Testing User Stories

As a potential client I want to know more about the artist and her story so that I can feel more confident and trust her skills.

1. Go to *Susana´s Portfolio* Webpage
2. Find more information in the *About* page, click in "Here" button to visit the *Gallery* page
3. Visit the social media links made available in every page of the Portfolio

As the designer I want clients to be able to match their expectations to my work and be abble to easily contact me and feel free to enquire about potencial projects.

1. Users can get to know the work through the *Gallery* page images and descriptions
2. Users can intuitively browse the Portfolio webpages
3. In *Contact* page, users can use the contact form by entering their details, type their message and press submit.

As a Stained Glass fan I want to browse through the images and find inspiration for a piece that would look amazing in my house.

1. Visit *Gallery* page and see Stained Glass finished projects
2. Visit relevant social media pages by clicking in the social media links, present in every page of the Portfolio.

As an event organiser I want to know more about the designer and her work so that I can decide whether to invite her to take part in an upcoming Crafts Fair.

1. Go to *Susana´s Portfolio*
2. Find more information in *About* page and click in "Here" button to visit the *Gallery* page
3. In *Contact* page, users can use the contact form by entering their details, type their message and press submit.
4. Visit relevant social media pages, links are available in all *Susana Portfolio* pages
